fire retardant fabric	cigarette test	BS 5852 source 0/EN 1021 part 1
pilling	5	
colour fastness to light	4	
stain resistance	water repellent	

maintenance and cleaning instructions

The fabric has an easy clean, water-repellent finish. Blot the liquid dirt using a paper towel. Then wipe off any remaining dirt with a damp cloth in a circular motion and allow the fabric to dry.

Do not use chemical solvents.

Do not expose the fabric to direct sunlight.

Delayed removal of stains reduces cleaning success.

Colour shades may slightly vary from dye-lot to dye-lot.
